

# Lab 1. Practical Questions on Introduction to Microsoft Power BI

---

**Ref : SalesData.xlsx**

## **Lab 1: How to connect Power BI to a data source and create a simple report?**

- **Task:** Connect to an Excel file containing sales data, load the data into Power BI, and create a bar chart to show total sales by region.
- 

## **Lab 2: How to create a calculated column in Power BI?**

- **Task:** Add a calculated column to determine the profit for each product using the formula  
 $\text{Profit} = \text{Sales} - \text{Cost}$ .
