

Lab 14. Conditional Formatting in Power BI Data Charts

Ref: SalesData.xlsx

Lab 1: How to apply conditional formatting to a bar chart to highlight high sales values in Power BI?

- **Task:** Create a bar chart that shows `Sales` by `Sub-Category` and apply conditional formatting to highlight bars with sales values above 50000.
-

Lab 2: How to apply conditional formatting to a table to change the background color of sales values based on performance in Power BI?

- **Task:** Create a table chart showing `Product Name` and `Sales`, and apply conditional formatting to change the background color of `Sales` based on the sales value (e.g., green for high sales, red for low sales).
