

# Lab 3. Implementing Data Modeling in Power BI

---

Ref :SalesData.xlsx

## Lab 1: How to create relationships between tables in Power BI?

- **Task:** Connect two tables, `Sales` and `Products`, in Power BI and create a relationship between them using the `Product ID` field.
- 

## Lab 2: How to create a calculated column using DAX for data modeling in Power BI?

- **Task:** Create a calculated column in the `SalesData` table that calculates the total revenue by multiplying `Sales` by `Quantity`.
