

Lab 4. Implementing Column Merging in Power BI

Ref : SalesData.xlsx

Lab 1: How to merge two columns into one column in Power BI?

- **Task:** Merge `First Name` and `Last Name` columns into a single `FullName` column in the `Customer` table.
-

Lab 2: How to merge multiple columns into one in Power BI and handle null values?

- **Task:** Merge the `City`, `State`, and `Country` columns into a single `FullAddress` column in the `Customer` table, handling null values appropriately.
