

7. Creating an Append Query in Power BI

Lab 1: How to append two tables with similar structures in Power BI?

- **Task:** Append two tables, `Sales_2023` and `Sales_2024`, to combine their sales data into one table. Both tables have similar columns: `ProductID`, `SalesAmount`, and `SaleDate`.
-

Lab 2: How to append multiple tables with different structures in Power BI?

- **Task:** Append three tables — `Sales_2023`, `Sales_2024`, and `CustomerDetails` — into a single table, with some columns common and others needing transformation.
