Working with Conditional Formatting in MS Excel

<u>Lab</u>

You are managing a student grade sheet and want to use **Conditional Formatting** in Excel to highlight specific results:

Example Setup in Excel:

Student Name	Subject	Marks
John Doe	Mathematics	85
Jane Smith	Science	92
Mike Johnson	English	60
Sarah Brown	Mathematics	48
Emily White	Science	76
David Green	English	54

Tasks:

1. Highlight **Marks** greater than or equal to 90 with a green fill and bold text.
2. Highlight **Marks** less than 60 with a red fill and bold text.
3. Use a **Data Bar** to visualize the marks distribution in the column.
