

Working with Math Functions in MS Excel

Lab

A teacher wants to calculate the average, maximum, and minimum scores of students in a class. The scores are listed in column **A** (from A2 to A11). Write formulas to:

1. Calculate the **average score** in cell **B2**.
2. Find the **highest score** in cell **B3**.
3. Find the **lowest score** in cell **B4**.

Example Setup in Excel:

	A	B
1	Scores	
2	85	Average:
3	90	Highest:
4	78	Lowest:
5	88	
6	92	
7	74	
8	89	
9	95	
10	80	
11	86	

Tasks:

1. Write the formula in **B2** to calculate the average score.
2. Write the formula in **B3** to find the highest score.
3. Write the formula in **B4** to find the lowest score.
