

Working with IF-Based Conditions in MS Excel

Lab

You are managing a list of students and need to determine whether each student has passed or failed based on their marks. A student passes if their marks are **greater than or equal to 50**.

Example Setup in Excel:

	A	B	C
1	Student Name	Marks	Result
2	John Doe	65	
3	Jane Smith	48	
4	Mike Johnson	85	
5	Emily Brown	42	
6	Sarah White	73	

Task:

1. Use an **IF** formula in column **C** to display "Pass" if the marks in column **B** are ≥ 50 and "Fail" otherwise.
