

Working with HLOOKUP Function in MS Excel

Lab

You are managing a monthly sales report where sales data for different regions is organized horizontally. Use the **HLOOKUP** function to retrieve sales data for a specific region and month.

Example Setup in Excel:

	A	B	C	D	E
1	Region	January	February	March	April
2	North	5000	7000	6500	8000
3	South	4000	6000	5500	7500
4	East	4500	6800	6200	7800
5	West	5200	7300	6700	8200

In another part of the sheet:

Region Month Sales

East March

Tasks:

1. Use the **HLOOKUP** function to retrieve the sales data for the specified **Region** ("East") and **Month** ("March").
 2. Populate the result in cell **C2**.
